The ABC Migrant Education Program provided students in grades 1st-6th grade with the opportunity to participate in a virtual summer school academy. The summer academy was 4 weeks long and provided services to 259 students. Students received instruction in English Language Arts, Mathematics, and technology literacy. In the area of English Language Arts student received enrichment and intervention support through the use of “Language Power”, a teacher designed program that focuses on empowering English Language Learners by building their listening, speaking, reading and writing skills. The focus in Mathematics was Pearson Realize Math and its digital platform, Savvas Learning. The students were also provided with an Imagine Math account. Imagine Math is an adaptive math program that adjusts to the student’s math ability. The programs primary digital platform was Google Classroom. Within these platform students were able to learn how to use google docs, google forms, and google meet. Throughout the summer program students were able to strengthen their understanding of academic content standards but also to receive exposure to and practice of the ISTE (Internationals Society of Technology for Education) technology standards.
