EPS is GROWING!

FOSTER YOUTH – HOMELESS – CUMULATIVE FOLDER FOR ALL

EPS provides quick and secure access to an array of comprehensive student information including demographics, enrollment history, current courses, attendance, and progress reports. A key feature of EPS, the **Electronic Cumulative Folder System**, gives participating districts the ability to share scanned documents within their districts or with other districts upon student transfer.

Educational institutions that choose to participate in the EPS community are empowered to identify and support vulnerable student populations and positively impact a child's educational performance and personal achievement.

An amended EPS Memorandum of Understanding was recently sent to each district for consideration and approval. The amendment options allow each district to indicate their level of participation in the EPS community by selecting the student populations served.

---

**Feature: Confidential Records Role**

**ADDITIONAL SECURITY FOR SENSITIVE FOLDERS**

Occasionally student records contain sensitive information. EPS has enacted the confidential records role to protect student privacy. Users with the Confidential Records role can see all document folders. Users without the role see an abridged folder list.
